

Please reject the NAB's petition 04-160 and please support XM's ability to provide programming such as XM Instant Traffic & Weather. I rely on my paid service with XM radio to provide programming and services that, because of the areas I travel, I cannot get any other way. I travel in South Texas where most AM/FM channels are spanish, or are not the programming I desire. I cannot get the variety and quality that I need except on XM radio.

Thanks,

Larry Dupler
